

# Greener Action Plan

Traditionally, workwear fabrics have been washed at 60 degrees and higher. However Portwest fabrics have been developed to give excellent washing results at lower temperatures. We recommend, where possible, to wash workwear at 40 degrees or less. This leads to a significant reduction in energy consumption.

Portwest is an environmentally conscious and responsible company. Our policy is to strive to ensure that all aspects of the business have the least harmful effect on the environment by implementing a comprehensive environmental management system.
