

Dear Portwest Customer,

### Declaration of Product Conformity

According to the REACH Regulation (EC) No. 1907/2006

The products your company or organisation buys from Portwest are considered sufficiently free of harmful substances under REACH Regulation (EC) No. 1907/2006.

Portwest can confirm to the best of our knowledge that none of our products contain any restricted substance listed under the latest version of Annex XVII, of REACH Regulation (EC) No. 1907/2006 above the individual limit values including current restricted per- and polyfluoroalkyl substances (PFAS) under Entry 68:

Perfluorinated carboxylic acids (C9 -C14 PFCAs), their salts and precursors

REACH Article 33 requires suppliers of articles to inform their customers of the presence in the article of substances of very high concern (SVHC) included in the candidate list (REACH Article 59) above a concentration of 0.1% weight by weight, so that information to allow safe use can be provided.

Portwest can confirm to the best of our knowledge that none of our products contain any SVHC above 0.1% weight-by-weight including the per- and polyfluoroalkyl substances (PFAS) listed on the latest version of the candidate list.

Portwest is fully supportive of the various industry efforts throughout the world to phase out the use of undesirable substances from PPE products and manufacturing processes. We will continue to actively monitor the candidate list for additions, and should it be necessary, we will provide safety information to our customers at the earliest opportunity.

Lucy Fallon
